2022 ANNUAL REPORT
PUBLISHED JANUARY 2023

Chief's Message

Freddy L. Johnson Sr.

It seemed like just yesterday that I introduced the 2021 Annual Report, and here we are a year later presenting the 2022 Annual Report. Really illustrates how time flies. Even though we are still affected by the various and on-going strains of the pandemic that still affects our members and communities, Stoney Point continuous to provide remarkable customer service protecting our citizens and communities.

To briefly recap, last year our department was faced with traversing through a budget shortfall as a result of the new Interstate-295 (I-295) corridor that runs through our district. Property tax dollar losses associated with the interstate corridor were equal to two (2) full-time firefighter positions. Thanks to our Board of Directors, funding was shifted from our annual Trail of Terror Funds to save the positions in order to maintain our full-time staffing levels. We thank them for their effort and leadership.

In March of 2022, our leadership team traveled to Orlando Florida to attend the 2022 CPSE Excellence Conference and appear before the Commission on Fire Accreditation International (CFAI) for our third re-accreditation. At the conclusion of our hearing the commission voted unanimously to reaccredit our department for the next five years. A direct credit to our incredible members and staff who embrace our high standards and work diligently to not only meet those expectations but to maintain.

We also received a FEMA Assistance to Firefighter Grant (AFG) in the amount of \$117,000.00 to assist us with the installation of a diesel exhaust removal system in both of our facilities. In September the new Dr. J. Larry Keen Regional Fire and Rescue Training Center complete with Burn Buildings, 5 Story Training Tower, Confined Space and Trench Rescue site and an indoor Swift Water Complex was dedicated here in Cumberland County, providing all our firefighters with a state-of-the-art fire training center to maintain their skills and obtain fire, rescue, and emergency medical services certification.

To address continuing growth, we added a second Brush Truck, new Chief's vehicle and replaced one of our service utility trucks. We were also able to finally install a heating system in our storage building to maintain climate control during the cold winter months. Our annual "Trail of Terror" fund raiser was also a success raising funds to support our public safety mission. We thank our neighbors and communities for their continuing support of our fundraising efforts.

As the year ended, our calls for service during 2022 increased over 2021, which is reflective to on-going growth and assisting our partner agencies through automatic aid. As in years past, during 2022 we faced many challenges handling all of them with confidence and professionalism.

In closing, I'm pleased to offer the 2022 Annual Report, which will Recap the events of 2022 and recognize the hard work, professionalism, and dedication of its members.

Our Board of Directors

The Stoney Point Fire Department Inc. is governed by an elected seven (7) member civilian board of directors. Board members serve a staggered four (4) year term with bi-annual elections. The Board meets on the 3rd Tuesday of each month at 7:30 pm with meetings rotated between Stations 13 & 19. The meetings are open to the public to attend and provide public comment. For meeting locations go to www.stoneypointfirerescue.com

About Us

The Stoney Point Fire Department Inc. (SPFD) was chartered on June 14, 1964 as a volunteer organization and is now providing fire suppression, rescue, hazardous materials, and medical first responder services out of two fire stations. On-duty staffing is provided 24 hours a day, seven days a week. SPFD during 2022 was staffed with 20 full time and 71 volunteer uniformed personnel and 18 support members with a total membership of 109 (82 percent volunteer) SPFD staffs two engine companies, cross-staffs a ladder truck and heavy rescue, as well as various other specialty units. SPFD minimum daily staffing consists of eight firefighters and officers supplemented by available volunteers. The minimum staffing for Station 13 (engine, truck, and heavy rescue) is 5 paid staff. The minimum staffing for Station 19 (engine company) is 3 paid staff. Department staffing increases overnight (1900 - 0700 hours) with 14 volunteers distributed between Stations 13 and 19.

The 21 square mile fire district is located in Cumberland County, NC, also known as the Sandhills Region, roughly 90 miles south of Raleigh. The latest population estimate (2019 American Community Survey) indicates a resident population of 20,351 within the district boundaries. Stoney Point also provides full responder service contracts to both the City of Fayetteville and Hope Mills providing full services to both municipalities, as well as automatic aid regionally.

Stoney Point currently holds a **Class "2" ISO** rating and is one of only two Volunteer Fire Departments in the United States that are Internationally Accredited with the Commission on Fire Accreditation International (CFAI). The department was first accredited in March 2012 and was re-accredited for the third time in March 2022 and is currently one of twenty four departments accredited in North Carolina.

2022 Stoney Point Organizational Structure

Vision Statement

The vision of the **Stoney Point Fire Department** is to enhance its capability as a community resource within the next five years to meet the needs of its citizens, volunteers, and employees. This will be accomplished by embracing change and challenging ourselves to be under a constant state of improvement striving for excellence.

Mission Statement

The **Stoney Point Fire Department's** mission is to protect its citizens and **create a safer community** through **coordinated** training, education, **prevention**, investigation, emergency **response** and leadership

The Stoney Point Fire Department achieves its mission and vision by building upon a system of values. We uphold professionalism as our core value. Our defining values also include:

Professionalism: *Our core value of professionalism defines who we are. We believe in upstanding and sound service to the community we serve. We take our role seriously and do all that we can to be a positive role model to future generations.*

Integrity: *We believe in living by moral and ethical principles. We demonstrate our values by the way we live our lives in the public's eye and in the confines of the fire station.*

Compassion: *We believe in caring for our community members who are suffering from tragic events in their lives. We do all that is possible to assist in stabilizing the situation with a merciful attitude.*

Service Excellence: *We believe in providing the best possible service to the community where we live and work. We do all we can to meet the needs of our neighbors through a humble, competent, and well trained, efficient team.*

Honesty: *We believe in being truthful, ethical, and fair. We strive to say what we mean and mean what we say even in times when the truth may hurt. We are dedicated to disclosing the entire truth.*

Stewardship: *We believe in protecting and caring for the community's resources and wish to be held accountable for their current and future use. We place the needs of the community ahead of our own.*

Courtesy: *We believe in being kind and polite to our fellow firefighters and the citizens we serve.*

Accreditation and ISO

Assistant Chief Derrick Clouston

Accreditation Manager

The Stoney Point Fire Department Inc. first achieved accredited status under the eighth edition of the Fire and Emergency Service Self-Assessment Manual (FESSAM) in 2012 through the Commission on Fire Accreditation International (CFAI). The department successfully re-accredited in 2017 under the ninth edition of the FESSAM and in December 2021 was again recommended by the onsite PEER assessors for re-accreditation under the tenth Edition. In March 2022 we appeared for the third time before the CFAI Commission during the Center for Public Safety Excellence (CPSE) Excellence Conference in Orlando Florida, and received unanimous approval for re-accreditation. Today Stoney Point is one of 301 accredited agencies world-wide, only twenty-three of which are in North Carolina.

In 2022 our department maintained all the required ISO training requirements consisting of a minimum of twenty (20) hours of training per firefighter. The required training hours increase depending on the various positions such as Engineer and Department Officers. Our specialty positions such as Department Safety and Maintenance Officers also participate in task specific continuing education and conferences throughout the calendar year.

Department Training 2022

Assistant Chief Kevin Murphy

2022 proved to be an excellent training year for SPFD. Our firefighters have made considerable efforts to meet or exceed their individual, crew level and ISO training requirements, and have done so balancing their work and family needs. This serves as a testament to our members commitment and dedication to our fire department and our constituents.

This year reflects a total of 19,257 total training hours which aligns and reflects the ISO requirements. Although this figure shows a 12% reduction in overall training hours from 2021, it is not indicative of our membership's outstanding efforts. Many of 2022's top performing firefighters who achieved ISO standards have departed for employment at Fayetteville Fire Department, Fort Bragg Fire or other career departments. Losing seven firefighters to this process during 2022 skews the numerical values.

Additionally, we have recruit firefighters in the SPFD training pipeline that do not receive credit hours for the Pre-Basic program until completion. Currently, we have twenty (20) firefighters in SPFD's Pre-Basic training program. This training pipeline brings our members to Firefighter Level I capabilities and covers the NFPA 1403 requirements for live burn operations. This is a robust program incorporating a rigorous SCBA component designed to increase firefighter survivability in an Immediately Dangerous to Life and Health (IDLH) environment. Many firefighters are challenged during this phase and require recycling to continue. Once complete, firefighters are afforded two hundred forty (240) hours of training.

In an effort to assist our entry-level firefighters basic recruit training is offered every Thursday night by the duty and career crews. Firefighters identify which recruit and basic skills they need, and the training is conducted. We have benefited through this process and seen an increase in the completion of our recruit training program over 2022. We will continue to implement this facet.

2023 will change slightly and offer additional collective training opportunities for our members. We will conduct two mandatory collective training events per month. SPFD will conduct two (2) monthly drills during these sessions which will include subjects like multi-engine benchmarks, operational art, technical rescue training, mutual and automatic aid operations, or any identified training weaknesses. Adding this training opportunity will enhance our skills and serve as a means for crew level assessment. The training officer will identify weekly training focus for the duty and career crew to ensure we are meeting our ISO requirement and stay abreast with the literature and current challenges experienced during operations. The focus will align with operational requirements as well as new and evolving operational requirements.

Coupling these additional training opportunities with our duty night training and classes offered through Fayetteville Technical Community College (FTCC) and other delivery agencies, our firefighters will have outstanding prospects to enhance their capabilities and achieve additional skills.

FTCC recently dedicated the Dr. J. Larry Keen Regional Fire & Rescue Training Facility. This state-of-the-art training vehicle offers outstanding opportunities for our firefighters to include driving and pumping simulators, confined space, trench and collapse rescue props, multiple burn buildings and classrooms that are unsurpassed at other facilities within the area.

An aquatics and swift water training facility will be constructed in spring 2023 which will allow SPFD to enhance our water rescue capabilities. Our firefighters will take advantage of these facilities individually and collectively throughout 2023.

SPFD will continue identifying training needs to meet our mission sets and include them in the training program. We will continue to improve and incorporate the most current best business practices to enhance capability and offer the best service delivery for our constituents.

Fleet Maintenance

Senior Engineer David Stewart

Stoney Point Fire Department Inc. has its own Fleet Maintenance program that coordinates and performs preventive maintenance and repair of our entire fleet of vehicles, apparatuses, and specialized equipment. Our Fleet maintenance division is staffed seven (7) days a week from 7 am until 7 pm to provide maintenance support to our fleet of vehicles, apparatuses, and specialized equipment. Annual certification of all ladders and breathing apparatuses repairs and testing is performed by private contractors. Major fleet maintenance and repairs are continued to be outsourced to local private truck and machinery vendors, including Atlantic Emergency Services (AES) a local Pierce Fire Truck warranty and repair merchant.

Our maintenance staff also maintains specialized vehicles and equipment belonging to the Cumberland County Fire Chiefs' Association.

Stoney Point's fleet maintenance facility sits on 12.87 acres and has two drive in maintenance bays that provide ample space for up to two apparatuses at a time, with the remaining building space used for storage. This 5000 square foot building is a significant improvement over our old fleet maintenance process of working within our apparatus bays.

Fire Life Safety Education

Assistant Chief Brandon Hanzal

The 2022 Campaign for fire life safety and community risk reduction began to get back to normal with the COVID crisis behind us. Members of our organization were welcomed back into public schools and local businesses that had not been available in the past couple of years. The Department made a strong effort to make a much larger footprint using social media as well as in-person events to get our public safety messages out to our public.

We continued to partner with Safe Kids Cumberland County with the goal of reducing the number of accidents in juveniles, with a focus on child passenger safety, bicycle, and water safety. The organization hosted numerous seat check stations around the county as well as three bike rodeos. The department still has 6 CPS technicians on staff and installed 165 seats and spent 1431 hours educating the public on Child Passenger Safety.

CPR training continued with monthly offerings for the public and department members. In 2022, 122 new AHA BLS provider / Recertification's and 881 hands only CPR students on the year. A large number of hands only CPR was conducted during the annual Trail of Terror fundraiser. We formed a partnership with the local hospital (Cape Fear Valley) to help facilitate this outreach. The Department used local billboards and social media to advertise public education messaging, fire safety, child passenger safety, and life-saving CPR.

Public education this year was back in the schools at the elementary level. We were once again allowed to have small groups back in person into the fire house such as Girl Scout troops and local church youth groups. Social media was also used to send out weekly educational messages to our citizens. Annual fund-raising events such as an Easter egg hunt, Trail of Terror, and Trunk or Treat were used to get educational materials out to the public. 9362 Citizens were reached out to during the 2022 Campaign.

2022 Fire Life Safety Education Continued

Assistant Chief Brandon Hanzal

2022 CERT Training Camp

The *2022 Trail of Tears* fund raiser was another success for our department. Attendance numbers reached 9000 customers during our eight (8) day schedule. As in years past, our **Public Fire Safety** messages were placed on local Lamar digital advertising boards and all ticketing materials and during scheduled intermissions fire safety messages were broadcast to the crowd. Website undeadfd.com and other social media sites were used to further messaging efforts. All funds raised are reinvested into our public safety mission. We thank all those volunteers that helped make the 2022 TOT season successful, and thank all our customers for their continued support.

Emergency Medical Services

Assistant Chief Sean Johnson

The Stoney Point Fire Department Inc., has a strong Emergency Medical Services (EMS) program, consisting of Basic Life Support (BLS) first responders and Emergency Medical Technicians (EMTs).

Our department remains committed to delivering exceptional service to our residents and visitors within our service areas as well as regionally. In 2022 our EMS call volume has increased from 2021, but with the still ongoing and various COVID-19 pandemic strains, we continued our COVID response protocols. As in previous years, we worked persistently to acquire and maintain equipment and supplies to keep our crews safe and reduce overall exposure not only from the virus but also the annual influenza.

In 2022 our crews answered 804 Emergency Medical and Rescue Calls therefore our monthly continuing EMS training and education remains a high priority for our department. Our medical staff participates in monthly EMS continuing Education on the 3rd Tuesday of each month.

Our crews work directly with the Cape Fear Valley Medical Center Emergency Medical System, who provides Advanced Life Support (ALS) paramedics and transports all patients to area hospitals.

By virtue of the authority vested in the By-Laws of the Stoney Point Fire Department and in recognition of meritorious progress in pursuing the training and educational objectives commensurate with the role of a qualified NFPA 1021 fire officer I and II, and of dedicated service to the citizens of the Stoney Point Fire District, the Chairman of the Board of Directors and the Fire Chief of the Stoney Point Fire Department hereby appoint

Lieutenant Chandler Stewart

2022 ANNUAL REPORT
PUBLISHED JANUARY 2023

Safety Officer

Lieutenant Chandler Stewart,

2022 was a successful Health and Safety year for the Stoney Point Fire Department. Our largest and most important milestone was that we worked some 57,600 employee hours without any injuries. That win is thanks to the hard work from all members to accomplish our mission safely while extending risk on the fire ground. Of our other victories, the next is a successful first-round review of our Health and Safety programs by the Center for Public Safety Excellence (CPSE) Peer Team. While some of the categories carried over from previous models of the accreditation template, the Health and Safety category (Category 11) is new and a focus for CPSE. The hash marks in the win column include a few new processes for identifying near-miss conditions we experience while working for the department and representing our department on the fire grounds and in the community. While the process is still in the development stage, the framework for reporting near misses is available in Emergency Reporting, our new record management system. On the continuous improvement front, we did identify the need to seek new technology for conducting Respiratory Fit Tests to comply with the requirements of our Respiratory program. After a bit of research, our Health and Safety Team did identify a new Fit Testing machine that returns results faster and does allow for the paperless recording of those results.

Stoney Point Fire Department was accredited by the Center for Public Safety Excellence (CPSE) in 2012. The road to accreditation was long but achievable. As we have been reaccredited through the years, one thing remains certain; the accreditation process is challenging. One challenge thrown at Stoney Point during this reaccreditation cycle was a new category identified as Health and Safety (Category 11). Some of the elements of Category 11 were pulled over from previous versions of the accreditation model, while others are of renewed focus. Elements within this category did include Health and Safety Officer responsibilities, policies and procedures, risk reduction, hazard identification, communications, risk identification, training, near-miss reporting, incident investigations, cancer exposure prevention, record keeping, fire ground safety, and other comprehensive topics. As is always essential, CPSE saw fit to focus effort on ensuring that accredited organizations have programs and processes devoted to the Health and Safety of current and future firefighters.

After reviewing our provided exhibits, the peer team did an interview with the Health and Safety officer. The interview went well and did focus on our efforts as a team toward keeping firefighters safe and whole. In the end, the CPSE Peer Team did indicate a positive message that they would recommend re-accreditation to the CPSE governing body.

2022 Incident Statistics

Mrs. Clarkie Johnson, Clerk to the Board

Your Stoney Point Fire Department responded to **1,563** calls for service in 2022, an average of about **4** calls per day and a **10%** increase over 2021. With **804** or **51.44%** of our total calls were for emergency medical services, while **759** or **48.56%** of our calls were fire, rescue and related emergency calls.

Our busiest month was **December 2022** with **154** calls, while our busiest day of the week was **Monday** with **249** calls. Our busiest SHIFT was **B'shift** with **544** incidents, and our busiest hour throughout the year was between **2 PM** and **3 PM** with **112** calls and again increasing between the hours of **4 PM** until **7 PM** averaging **105** calls each hour.

We responded to **410** total incidents within our Fayetteville Contracted Areas, and **103** within our Hope Mills Contracted Areas. We also assisted both Fayetteville and Hope Mills with automatic aid calls not located within our contracted areas.

We also responded to **63** incidents in Hoke County, **16** calls with Cumberland Road FD, **36** calls with Cotton FD, **14** with Pearce's Mill FD. We also responded to an additional **54** incidents assisting other departments and agencies in Cumberland County.

Another noteworthy fact is that for all our calls within our primary response areas, our average response time was **6:38** with the average on scene time for all calls **44** minutes. Lastly during 2022 we experienced **345** or **22.07%** overlapping calls, representing 3 to 4 simultaneous calls.

Stoney Point 2022 Incident Calls By Agency

Auxiliary Services

President Deborah Aberg

The Stoney Point Fire Department Ladies Auxiliary traces its history back to when the Fire Department was first chartered in June 1964. At the time a small group of women wanted to serve and support their husbands as firefighters and assist with annual fund raisers in support of the fire department mission. Early fund raisers sponsored by the ladies auxiliary consisted of beauty contests, bingo nights, raffles as well as the fire departments annual Fish Fry and Barbeque Plate sales, with all proceeds going towards fire department operations and equipment. Over time and at the turn of the century in 2000's the name of the ladies auxiliary was changed to the Stoney Point Auxiliary. Today the Stoney Point Fire Department Auxiliary consists of a core group of dedicated volunteers that proudly serve our department and community.

There primary mission is to serve and support our emergency services objective. During the 2021 calendar year our auxiliary's mission was again curtailed because of the on-going COVID-19 pandemic, with many of our normal support functions canceled for the safety of our auxiliary members.

Membership in the Stoney Point Auxiliary is an excellent way to show your community support, and our auxiliary members always encourage participation by inviting new members to participate and join. Our auxiliary meets at Station 13 the 2nd Wednesday of each month at 7:30 pm, and anyone interested in joining should call the Station at 910-424-0694.

| Auto Policy & Buildings & Grounds | |
| Worker's Compensation | |
| Blue Cross & Blue Shield | |
| Legal & Accounting | \$4,333 |
| Attorney & Accounting Fees | |

Total \$2,360,085

FY 2022 Fire Department Budget \$ 2,925,969

Whereas, our Fiscal Year (FY) budget expenditures exceeded our annual budget, we were fortunate to utilize other income such as the Payroll Protection Plan (PPP) Assistance to Firefighter Grant (AFG) Safer funds, Trail of Terror Fundraising Funds and corporate savings to meet our FY 2022 financial liabilities.

Noteworthy is the fact that our annual budget is based on the FY accounting period, while our annual spending plan is based on a calendar year disposition.

While we rely on property taxes, we do not receive any funding until property taxes are paid and collected. As a result we not receive the majority of our annual budget until the month of January each year. Therefore, we must budget funds from the previous FY well into the next fiscal year to mitigate on-going financial liabilities.

GLOSSARY OF TERMS

North Carolina Department of Insurance (DOI) The North Carolina General Assembly created the North Carolina Department of Insurance in 1899. Now, more than 100 years later, the Department of Insurance provides valuable services to the people of North Carolina by regulating the insurance industry, licensing insurance professionals and others, educating consumers about different types of insurance, handling consumer complaints and much, much more. The Department also houses the [Office of State Fire Marshal](#), which is responsible for a host of other services that improve North Carolinians' daily lives.

Office of the State Fire Marshal (OSFM) A section within the North Carolina [Department of Insurance \(DOI\)](#). Many people may not realize that the Commissioner of Insurance also serves as the State Fire Marshal in North Carolina. OSFM is comprised of the following six divisions: Engineering and Codes; Manufactured Building, Risk Management, Fire and Rescue Training and Inspections, Fire and Rescue Commission, Programs, Prevention and Grants.

Center for Public Safety Excellence (CPSE) – is a nonprofit corporation that promotes continuous quality improvement by providing training and career resource information to the fire and emergency service agencies and personnel that serve communities throughout the United States. In addition, CPSE serves as the governing body for the essential entity organizations that offer accreditation, education, and certification services to first responder and fire service industry professionals and agencies.

National Fire Protection Association (NFPA) – NFPA is a nonprofit organization whose goal is to reduce the worldwide burden of fire and other hazards on the quality of life by providing and advocating consensus codes and standards, research training, and education. NFPA serves as the world's leading advocate of fire prevention and is an authoritative source on public safety.

Insurance Service Office (ISO) - The Insurance Services Office, or ISO for short, is an insurance advisory organization, and its expert staff collects information about municipal fire protection efforts in communities throughout the USA. ISO analyzes relevant data and assigns a Public Protection Classification (PPC) a number from 1 to 10. Class 1 represents superior property fire protection, and Class 10 indicates that the area's fire suppression program does not meet ISO's minimum criteria.

Occupational Safety Health Administration (OSHA) – OSHA'S mission is to prevent work related injuries, illnesses, and deaths by issuing and enforcing rules (called standards) for workplace safety and health.

Assistance to Firefighters Grant Program (AFG) – The Assistance to Firefighters grant (AFG) provides financial assistance directly to fire departments and non-affiliated EMS organizations to enhance their abilities with respect to fire and fire-related hazards. The primary goal is to help fire departments meet their firefighting and emergency response needs.

Staffing for Adequate Fire and Emergency Response Grants (SAFER) was created to provide funding directly to fire departments and volunteer firefighter interest organizations to help them increase the number of trained "front line" firefighters available in their communities. The goal of SAFER is to enhance the local fire departments' ability to comply with staffing, response and operational standards established by the NFPA 1710 & 1720 and OSHA 1910.134.

"Trail of Terror," our local and annual department fund raiser conducted during the month of October and all funds raised are re-invested back into the fire department with purchases related to our missions and goals.
